### Vaccination comes with privileges

COVID-19 has had a significant impact on our life, work, and hobbies. The best thing to do to protect yourself and help us all get back to life as we remember it pre COVID-19 is to get **COMPLETELY VACCINATED**. The COVID-19 vaccination provides an additional layer of protection against the virus while also assisting in the development of community immunity. Community immunity helps protect our friends, family, and loved ones from being sick from COVID-19, particularly children who are too young to receive the vaccine.

### VALENTINE'S DAY

The yearly celebration of romance, roses, cards, hearts, chocolates, and possibly wedding rings. At least, that's how we've learned about it. But how did this romantic vacation get started? Stories of Valentines associated with February 14 include a story of Saint Valentine's arrest in the third century for ministering to Christians persecuted by the Roman Empire. As it turns out, no one truly knows the original origins of this storied event, and none of the hypotheses seem to make sense. Even historians disagree about the specific traditions that the modern concept is based on.

## Building Improvements

The common area disinfection is one of the successful attempt of the Body Corporate towards a sustainable work place. The best cleaning practice are performed to the corridor, lift and lift lobbies, toilets and service rooms. The breakdown of the Covid 19 has made the disinfection and sanitization a necessary added facility to efficiently minimize the spread of the virus.

## Master Community Rule: Health and Safety Guidelines

All Owners must comply with all fire, safety, health and environmental laws, rules and regulations in relation to its Property under Applicable Laws and as are further prescribed in the Declaration and the Health and Safety Guidelines issued and updated by the Master Developer from time to time.
